EDUCATION

G H Raisoni College of Engineering and Management

June 2020 – June 2024

B.tech Artificial Intelligence - CGPA - 7.89

Pune, India

Indira Gandhi Madhyamik Vidyalaya and Jr. College, Dharangaon

2019 – 2020

HSC - Science - Percentage - 79.85%

Jalgaon, India

COURSEWORK / SKILLS

- Artificial Intelligence
- Machine Learning
- DBMS
- OOPS Concept

PROJECTS

Accounts Billing Management and Analysis in Healthcare 🔗 | Python, LLM

July 2024

- Audited and analyzed billing data in the healthcare sector, focusing on accuracy and identifying discrepancies using Python and Pandas.
- Generated detailed billing reports utilizing AI, including OpenAI API and Google Generative AI, to enhance the understanding of billing patterns.
- Conducted data validation and cleaning, ensuring high data quality by addressing missing values and duplicates.
- Visualized analysis results using Matplotlib and Seaborn, providing clear insights into billing data trends and anomalies.

GUI-Based Human Detection and Tracking using SSD 🔗 | Python, TensorFlow **July 2023 - Nov 2023**

- Developed system utilizing the SSD and Haar Cascade Classifier algorithms for real-time human detection and tracking.
- Implemented SSD, a deep learning-based object detection model, for accurate human detection in captured frames.
- Utilized Python programming language to develop a system, incorporating Tensorflow, OpenCV, HOG Descriptor, YOLO V3 algorithm, MobileNet, and Tkinter for GUI.
- Achieved 98% accuracy in human detection using TensorFlow, showcasing strong performance and reliability.

Traffic Signal Violation Detection 🔗 | Yolov3, Object-Detection

Nov 2022

- Developed Traffic Signal Violation Detection system using Python for real-time automation of traffic signal violation detection.
- Implemented YOLOv3 for fast and accurate object detection of vehicles violating traffic signals.
- Utilized MobileNet for efficient image classification, enabling deployment on mobile and embedded devices.
- Enhanced traffic management system with scalable solution, compatible for integration with existing traffic monitoring infrastructure.

INTERNSHIP

Sanjayrekha Aggregator Pvt. Ltd. AHEN

Jan 2024 – June 2024

Software Developer Intern

- Developed and maintained complex web applications using React.js, creating reusable components and implementing responsive designs.
- Enhanced user experience by implementing user-friendly UI components with HTML, CSS, and JavaScript.
- Collaborated with cross-functional teams to ensure seamless frontend and backend integration.
- Participated in Agile methodologies, including daily stand-ups and sprint reviews, to deliver features on time.

TECHNICAL SKILLS

Languages: Python, Machine Learning, NLP, MySQL, HTML, CSS, JavaScript(Basics)

Developer Tools: VS Code, Jupyter Notebook, GitHub

Technologies/Frameworks: Data Analysis, Tensorflow, PyTorch, OpenCV, AWS, ReactJS, Linux, Git

CERTIFICATIONS

- Python
- Machine Learning - Cognitive Class
- Python for Deep Learning - Udemy
- Neural Network and Deep Learning - Coursera
- AI For India 2.0 - GUVI
